

You have the power to protect our community from meth abuse.
Now you have the product.

Nexafed is a next-generation pseudoephedrine product that provides the maximum-strength, non-drowsy nasal congestion relief your patients expect and the meth-detering technology you want to help keep your community safe.

WE NEED NEXAFED IN YOUR PHARMACY. IT'S THE ONLY METH-DETERING PSEUDOEPHEDRINE PRODUCT:

- With Impede[®] technology that disrupts extraction and conversion of pseudoephedrine to meth
- That is therapeutically equivalent to Sudafed[®] immediate-release pseudoephedrine tablets*
- That meets the U.S. Pharmacopeial Convention (USP) standard for dissolution¹

As a pharmacist, you have an opportunity to make a difference in your community. By stocking and recommending Nexafed, you're providing a new standard of community care – one that will encourage others to do the same and help preserve our legitimate medical access to pseudoephedrine, the most effective decongestant. For more information about Nexafed, call your local wholesaler or visit Nexafed.com.
